EDUCATION

B.Sc. Computer Science | Sapir College | 2022 – 2025 | GPA: 90

TECHNICAL SKILLS

Languages: TypeScript, Java, C#, CSS, HTML

Framework: Node.js, Spring boot, .NET, REST APIs

Storage & Queues: MySQL, MongoDB, Redis, Cassandra, ElasticSearch, Kafka

Tools: Docker, Git, Kubernetes, AWS, Micro Services, CI/CD, REST API, Scraping, GitHub Actions, EC2, ECS, EKS

Testing: Jest, Vtest, Cypress

Architecture: OOP, Design Patterns, Clean Architecture, Clean Code

FEATURED PROJECTS

Portfolio & Live Demos: [Portfolio](#)

Real-Time Battlefield Tracking System – Distributed military logistics platform

Stack: **Docker, Kubernetes, Kafka, Redis, Microservices.**

Built **scalable tracking system** with **event streaming** and caching. Deployed **containerized microservices** with orchestration for real-time location monitoring and HQ management dashboard.

Airbnb Clone – Production-ready full-stack rental platform

Stack: **Next.js, TypeScript, PostgreSQL, Prisma, Stripe, NextAuth**

Built complete booking system with **OAuth** authentication, with **Stripe**.

AI Student Helper – Interactive full-stack learning platform

Stack: **React, Node.js, Express.js, Firebase, Unity WebGL, OpenAI API**

Created end-to-end study tool with document processing, user authentication.

Survivor Game – Action survival game

Stack: **C#, Unity, State Pattern, Observer Pattern.**

Developed game with character **state management** and **event system** using **design patterns** for **scalable** game architecture.

Othello Game – game with event-driven architecture

Stack: **.NET Core, C#, Event Management.**

Developed game using **OOP** and **design patterns**. Implemented **event-driven architecture**.

Data Processing Pipeline – file compression system.

Stack: **Java, Spring Boot.**

LZW Compression, Batch Processing Built **RESTful API** with asynchronous processing for file compression. Implemented multithreading.

EXPERIENCE

Teaching Assistant — Perach Program | 2023 – Present

Instructed **full-stack web development**, **JavaScript**, **React**, **Node.js**, and **Express.js**

Mentored students in building end-to-end projects with **REST APIs** and **database** integration.
